Post-Settlement Nurture Strategy

Email & SMS Journey | 5-ICA Framework | Go High Level

Version 2.0 | April 2026 | CONFIDENTIAL

5

ICA Segments
Separate journeys

12

Touchpoints
Per ICA over 12 months

9–12

Month Window
Target return loan

100%

FHL Cross-Sell
Embedded in all journeys

1. Executive Summary

The current FFG post-settlement sequence is a 6-email, one-size-fits-all program running on SendGrid. In 5,456 email triggers, it achieved 187 unique clicks — a 3.4% click rate — and has generated no measurable return loan applications. The sequence sends the same referral email twice with identical subject lines, leaves customers in silence for 88 days at a time, contains no value-add content, no ICA segmentation, no SMS, and no pathway to FHL.

This document replaces that program entirely. What follows is a 12-month, 5-ICA post-settlement nurture system built for Go High Level, designed around three outcomes:

- Drive repeat FFG loan applications in the 9–12 month window
- Convert FFG customers into FHL customers through deliberate, relationship-first cross-sell
- Build Fox Group's database intelligence in GHL using Fox-MIS as the intelligence layer

The system works on a quarterly cadence — four milestone touchpoints per year, with educational and milestone emails in between.

Every journey is ICA-specific. The content, timing, cross-sell pathway, and FHL handoff moment all change based on who the customer is.

Behavioural triggers create branches. When a customer engages, the sequence accelerates. When they click on home loan content, they enter an FHL handoff workflow.

Fox-MIS is the content engine. Every email is written by the EDM Creator Agent using ICA intelligence, then loaded into GHL as a template.

2. Current State Analysis

The existing sequence (FFG New Customer Database Entry, SendGrid) was analysed in full. Here is what the data reveals.

2.1 Sequence Structure

Email	Timing	Subject	Opens	Clicks
Email 1	Day 3	{{first_name}}, I'd love your feedback	74.4%	7.1%
Email 2	Day 91	{{first_name}}, you can Refer a Friend and Earn a \$100 Eftpos Card	55.2%	1.7%
Email 3	Day 182	{{first_name}}, you can Refer a Friend and Earn a \$100 Eftpos Card	48.3%	2.1%
Email 4	Day 365	{{first_name}}, need some money for your next life project?	41.9%	1.1%
Email 5	Day 395	{{first_name}}, you're nearly there!	48.0%	1.9%
Email 6	Day 730	{{first_name}}, need some money for your next life project?	—	—

2.2 What the Data Tells Us

- Open rates are genuinely strong (41–74%) — customers recognise Fox and trust the sender name. This is the relationship working. It is not being leveraged.
- Click rates are the failure point (1–7%). There is nothing worth clicking on. The review email is the only touchpoint with real purpose — and it delivers 7.1% clicks. Everything else is transactional noise.

- The same refer-a-friend email was sent at Day 91 and Day 182 with an identical subject line. This is the single clearest signal that the sequence was not designed — it was assembled.
- 88 days of silence between Email 1 (Day 3) and Email 2 (Day 91). A customer who just settled a loan hears nothing for three months. The relationship window goes cold.
- No ICA segmentation. A young, first-time car loan borrower rebuilding credit gets the same email as a prime business equipment customer. The content serves neither.
- No SMS. No FHL cross-sell. No behavioural branching. No content of any value.
- Email 4 and Email 6 use the same subject line — 365 days apart. Whoever ends up in Email 6 (launched recently, no data yet) has already seen this subject line once.

2.3 What We Keep

- The Google Review request at Day 3. It works (74.4% open, 7.1% click). It stays — and becomes the entry into the new system, not the end of it.
- The refer-a-friend program and \$100 Eftpos Card incentive. The Day 91 referral mechanic demonstrated genuine engagement. This is retained as a dedicated touchpoint within each ICA journey, positioned where it makes most sense for that segment.
- The Trusted Partners concept. As the Fox platform develops, a Trusted Partners library — connecting customers with one recommended provider per category (conveyancers, builders, financial planners, accountants, solar) — will integrate naturally with the nurture journey at relevant touchpoints across all five ICAs.
- A personal team sender name. Relationship emails from a named sender always outperform generic brand-name senders in financial services. The Fox Finance Team approach maintains the warmth of a personal sender while scaling across a growing team.
- First name personalisation — minimum standard, non-negotiable.

3. Design Principles

These principles govern every decision in this system. If a proposed touchpoint or piece of content does not serve at least one of these principles, it does not belong in the sequence.

Principle 1 — Value first, always. Every email must give the customer something useful before it asks for anything. Information, insight, a milestone, a tool — something real.

Principle 2 — ICA-specific, not one-size. The content, timing, cross-sell pathway, and tone change for each of the five ICA segments. One customer's milestone is another customer's irrelevance.

Principle 3 — The customer is the hero. FFG is the guide. Every message positions the customer's goal (buy a home, grow a business, build credit, upgrade their life) — not FFG's products.

Principle 4 — Earn the right to sell. We deliver 2–3 pieces of value for every soft product mention. The 9-month window is where we earn the right to say 'ready when you are.'

Principle 5 — Every FFG journey ends with an FHL conversation. The cross-sell is not an add-on — it is built into the architecture of every ICA journey from the start.

Principle 6 — Behaviour drives the sequence. A click is a signal. Engagement is data. The system responds to what the customer does, not just when the calendar says it is time to send.

4. System Architecture — Go High Level

The system runs five separate ICA workflows in GHL, fed by a Master Entry Workflow that identifies the customer's ICA tag at settlement and routes them into the appropriate journey. All workflows share common behavioural branch logic.

4.1 GHL Workflow Structure

Layer	Description
Master Entry Workflow	Triggered when 'FFG_Settled' tag is applied. Checks ICA tag (ICA_YPMB, ICA_EPFB, ICA_PCLRB, ICA_BAB, ICA_PVB) and enrolls contact into the corresponding ICA workflow. No content here — routing only.
ICA Sub-Workflows (×5)	One per ICA. Contains all email and SMS touchpoints for that segment. Runs independently. Behavioural branches operate within each workflow.
Behavioural Branch Workflows	Separate workflows triggered by tags applied from behavioural events (email clicks, SMS replies, FHL content engagement). These pause the ICA workflow and enrol the contact into the appropriate branch.
FHL Referral Workflow	A standalone 3-email introductory sequence to FHL. Triggered when any customer clicks on FHL-related content in any ICA workflow. Runs in parallel, then returns contact to ICA workflow.
Broker Handoff Workflow	Triggered when 'FFG_HotLead' tag is applied. Sends an internal GHL task/notification to the assigned broker. Pauses email sequence for 14 days while human follow-up occurs.
Lead scoring	Based on interaction with content can be pushed to pipeline for team to contact.

4.2 Contact Tagging System

Tags are the nervous system of this architecture. Every contact carries a consistent set of tags that drive workflow entry, branch decisions, and reporting.

Tag	Applied When	Function
FFG_Settled	Loan settles	Triggers Master Entry Workflow
ICA_YPMB / ICA_EPFB / ICA_PCLRB / ICA_BAB / ICA_PVB	At settlement (manual + AI assist)	Routes into ICA sub-workflow
LoanType_[type]	At settlement	Used for personalisation within emails (e.g. Car, Personal, Business, Equipment)
FFG_HighEngagement	3+ consecutive email opens	Cadence increases to monthly EDMs relevant to ICA. Triggers FFG workflow/broker notification.
FFG_LowEngagement	2 consecutive no-opens	Switches to SMS-first, reduces frequency
FHL_Interest	Click on any FHL-related link 2 consecutive times	Triggers FHL Referral Workflow + broker notification
FFG_HotLead	Clicks FFG product CTA in months 7–12	Triggers broker handoff, pauses sequence for 14 days
FFG_RepeatCustomer	Second loan settled	Exits this workflow, enters Repeat Customer journey
FFG_ReferralGiven	Refers a friend (tracked via unique link)	Triggers referral thank-you + reward workflow

4.3 The Quarterly Cadence

The base cadence for all five ICA journeys follows the same quarterly rhythm. Content within each touchpoint is ICA-specific — the timing structure is shared.

Timing	Touchpoint Name	Channel	Primary Purpose
Day 3	Welcome & Review Request	Email	Capture while relationship is warm. Google Review request, reintroduce refer-a-friend program, introduce access to Trusted Partners, confirm ongoing value-add content personalised to them and watching the market to keep them on the best deal.
Day 7	First Check-In	SMS	Quick, personal. Confirm everything is working. Plant goodwill.
Day 30	Month 1 Value Drop	Email + SMS	First piece of genuine value content. ICA-specific. No ask.
Day 90	Quarter 1 Milestone	Email + SMS	Celebrate first quarter. Progress update. ICA-specific insight.
Day 180	Quarter 2 Value + FHL Seed	Email + SMS	Mid-year value. First soft introduction of home loan concept.
Day 270	Quarter 3 — FHL Warm-Up	Email + SMS	Anticipate next need. ICA-specific. FHL more prominent.
Day 365	Q4 Anniversary + Return Pitch	Email + SMS	Loan anniversary. Credit milestone. Soft return loan pitch.
Day 365+ (if no return)	Win-Back	Email only	For non-engaged contacts. Different hook. One last attempt.

Note: The Month 1 Value Drop (Day 30) is an additional touchpoint not in the original design. Research confirms that the 3-month silence between Day 3 and Day 91 was the single biggest relationship gap. Day 30 closes it without over-communicating.

5. Behavioural Branching Logic

The sequence responds to customer behaviour. Four trigger categories drive branching. All branches are managed via GHL workflow 'If/Else' conditions and tag-based enrolment.

Trigger	Tag Applied	Sequence Action	Broker Notification
3+ consecutive email opens	FFG_HighEngagement	Add interim SMS between quarterly emails. Month 6+: include broker call offer in SMS.	Yes — internal task created for assigned broker.
Email link click — FFG product page	FFG_HotLead (if M7+)	7-day wait → personal broker follow-up email. If Month 7 or later: broker handoff workflow triggered.	Yes — internal task created for assigned broker.
Email link click — FHL content	FHL_Interest	Immediately enrol in FHL Referral Workflow (3-email FHL intro sequence). Pause ICA workflow for 21 days.	Yes — FHL broker notified with contact details and ICA type.
2 consecutive no-opens	FFG_LowEngagement	Pause email sequence. Send re-engagement SMS with different hook. If SMS engaged: resume email. If	No.

SMS reply (any)	FFG_SMSActive	no engagement: reduce to quarterly email only. Flag for manual broker review within 24 hours. Do not automate — human must respond.	Yes — urgent task to broker.
Click on calculator / rate tool	FFG_RateResearch	If Month 6+: add 'rate review' email within 7 days. Include broker CTA.	No — unless second click within 14 days.
No engagement for 6 months	FFG_Dormant	Exit active sequence. Enrol in bi-annual re-engagement (every 6 months, educational only).	No.

GHL implementation note: Behavioural triggers on email opens have become less reliable due to iOS Mail Privacy Protection (Apple auto-opens emails). For this reason, link clicks are used as the primary engagement signal — not opens. Open rate data is still reported, but click-based triggers are the operational currency of this system.

6. The Five ICA Journey Maps

Each of the five ICAs receives a tailored journey. What follows is the touchpoint map, content framework, subject line approach, and FHL cross-sell pathway for each segment.

All email copy is produced by the Fox-MIS EDM Creator Agent using ICA intelligence from CLAUDE.md. Subject lines below are frameworks — final copy is drafted by the agent, reviewed by Rowdz, and loaded into GHL.

ICA 1 — Young Practical Motor Borrower

Car loan customer | First-time or near-prime borrower | FHL pathway: First Home Buyer

Who they are

Under 40. Renting or living at home. Casual, part-time, or full-time employed. Normally first time borrowing or maybe have had a small loan previously. Credit history is limited or recovering. They came to Fox anxious about approval — and we came through for them. That moment of trust is the foundation for everything that follows.

What they need from this journey

- Reassurance that the loan is working and they made the right choice
- Education on how this loan is building their financial future
- Celebration of milestones — they are quietly proud of what they've achieved
- A clear, non-intimidating introduction to home ownership as a future possibility
- To feel like Fox is genuinely in their corner — not selling to them
- Presentation of how we can use finance to build their lifestyle and wealth

Journey Map

Touchpoint	Channel	Theme	Content Hook	FHL Cross-Sell
Day 3 (Email)	Email	Review & Thanks	Subject: '[Name], you just did something worth celebrating' Content: Warm thank you. What this loan means for their life. Google Review CTA. Tone: Celebratory, personal, genuine.	None — too early.
Day 7 (SMS)	SMS	Check-In	Hey [Name], just checking in — car going well? Any questions about your loan, we're here. — The Fox Team	None.
Day 30 (Email)	Email	Credit Builder	Subject: 'Did you know your loan is building your credit score?' Content: How responsible repayment builds credit history. What a strong credit score unlocks (better rates, bigger loans, home loans). One practical tip. No CTA. Just value.	None — too early.
Day 90 (Email)	Email	Q1 Milestone	Subject: '3 months in — here's what's changed for you' Content: Progress milestone. 'You've made X repayments. You've built X months of positive credit history.' Budgeting tip. No ask. SMS (Day 92): 'Hey [Name], 3 months with your new car — we hope it's been worth every repayment. See your progress update → [link]'	None — relationship building.
Day 180 (Email + SMS)	Email + SMS	Halfway Point + Home Seed	Subject: 'You're halfway through — and your options are growing' Content: 6-month credit milestone. What good credit now means for their future. Introduce the idea of home ownership as a future goal — not a product pitch. Link to 'First Home Buyer Guide' on FHL site. SMS (Day 183): 'Hey [Name], 6 months down — your credit is growing. We've put together something that might surprise you. [link]'	Soft seed: 'Thinking about your first home? It might be closer than you think.' → FHL First Home Buyer guide link.

Day 270 (Email + SMS)	Email + SMS	Home Ownership Warm-Up	Subject: 'What does it actually take to buy your first home?' Content: Plain English guide to first home buying process. Deposit, pre-approval, stamp duty, FHOG. Reference the 5-step FHL journey. Include link to FHL borrowing power calculator. SMS (Day 273): 'Hey [Name], ever wondered what it actually takes to buy your first home? We break it down here: [FHL calculator link]'	Direct FHL introduction: 'Our home loan team at Fox Home Loans helps first home buyers just like you.' → FHL /home-loans/first-home-buyer/link. Tag: FHL_Interest if clicked.
Day 365 (Email + SMS)	Email + SMS	1-Year Anniversary	Subject: 'One year ago, you made a great decision. Here's what's next.' Content: Loan anniversary. Credit score has improved significantly. What they're now eligible for (better rates, higher amounts, home loan consideration). Soft pitch: are they ready for their next step? SMS (Day 365): 'Hey [Name], it's been exactly one year since your loan settled. We're proud of you — and we'd love to help with whatever's next. [link]'	Strong FHL cross-sell: 'Ready to talk about your first home? The Fox Home Loans team is here.' → FHL /apply/ or /home-loans/first-home-buyer/

Content theme across journey: Credit confidence and financial growth. Every email celebrates how far they've come and points toward where they can go.

Language we use: 'Your credit story', 'you've earned this', 'closer than you think', 'one step at a time', 'we believe in you'.

Language we avoid: 'Apply now', 'rates from', 'you may be eligible', 'lending criteria apply' (save compliance notes for footer only).

FHL trigger point: Day 270 is the primary FHL conversion window for this ICA. A click on any FHL content applies FHL_Interest tag and triggers the FHL Referral Workflow.

Return loan pathway: After a car loan, the most natural next FFG loan for YPMB is a personal loan for a lifestyle goal (travel, course, emergency fund) or a vehicle upgrade. Target the return loan conversation from Month 9. Subject line approach: 'Your credit has grown — what would you do with a bigger loan?' Debt consolidation is not a natural next step for this ICA — they typically have limited existing debt.

Blog Content Integration

---------------------	---	-----------------	---------------------------

ICA 2 — Established Personal Finance Borrower

Personal loan customer | Debt consolidation, renovation, travel, wedding | FHL pathway: New Purchase or Refinance

Who they are

30–59 years old. Employed full-time. Renting or mortgaged. They came to Fox to solve a specific life-event problem — consolidate debt, fund a renovation, pay for a wedding, or take a holiday. They're financially aware but want clarity, not complexity. They've probably done their research. They respect professionals who listen and have some understanding of credit.

What they need from this journey

- Practical financial education that makes them better at managing money
- A sense that Fox is working for them — not just waiting for the next transaction
- Life-event relevant content that anticipates what comes next for someone in their situation
- A warm, credible introduction to Fox Home Loans when the timing is right

Journey Map

Touchpoint	Channel	Theme	Content Hook	FHL Cross-Sell
Day 3 (Email)	Email	Review & Thanks	Subject: '[Name], thanks for trusting us with this' Content: Acknowledge what they used the loan for (renovation, wedding, etc.) where possible via personalisation. Google Review CTA. Genuine warmth. Tone: Personal, professional, warm.	None.
Day 7 (SMS)	SMS	Quick Check-In	Hey [Name], hope everything's settled in nicely with your loan. Give us a call if anything comes up. — The Fox Team	None.
Day 30 (Email)	Email	Financial Clarity	Subject: 'Three things that make a personal loan work for you (not against you)' Content: Practical tips — extra repayments, redraw facilities, loan health check. Short, actionable. No ask. Link to: Loan repayment calculator.	None.
Day 90 (Email + SMS)	Email + SMS	Q1 Progress	Subject: '[Name], 3 months in — how's it tracking?' Content: Milestone summary. Celebrate progress. Introduce the idea of financial planning for the next 12 months. One forward-looking question ('What are you working toward next?'). SMS: 'Hey [Name], just hitting your 3-month mark — we hope the loan has made a difference. Anything we can help plan for next? [link]'	None yet.
Day 180 (Email + SMS)	Email + SMS	Mid-Year Review + Home Seed	Subject: 'You're halfway there — what does the next 6 months look like?' Content: Financial mid-year review framework. Are they on track? Could consolidation save more? Introduce home ownership or refinancing as a next chapter concept. SMS: 'Hey [Name], 6 months in — have you thought about your next financial goal? We'd love to help you plan it. [link]'	Soft seed: 'Whether it's buying a home, refinancing, or something else — our home loan team is worth a conversation.' → FHL /home-loans/health-check/ or /apply/
Day 270 (Email + SMS)	Email + SMS	Next Chapter	Subject: 'What would your finances look like in 12 months if you made one smart move now?' Content: Life-stage financial planning.	Direct FHL introduction: 'If a home loan — or refinancing your current

			For someone who just paid off a personal loan, what comes next? Renovation equity? Home upgrade? Investment property? Link to relevant FHL calculator. SMS: 'Hey [Name], have you ever wondered what your next financial move should be? We think we know. [link]'	one — is part of the plan, the Fox Home Loans team can run the numbers for you.' → FHL /apply/ CTA.
Day 365 (Email + SMS)	Email + SMS	1-Year Anniversary	Subject: 'A year ago you made a decision. Here's what you can do with that momentum.' Content: Celebrate the anniversary. Acknowledge what they achieved. Now — what's next? Soft return loan pitch (is there another goal to fund?) or refinance discussion. SMS: 'Happy one-year mark, [Name]. It's been great having you with us. What are you working toward next? — The Fox Team [link]'	Strong FHL cross-sell: 'Ready to talk about your home loan options? The Fox Home Loans team has helped hundreds of people at exactly this stage.' → FHL /apply/

Content theme: Financial momentum and life-stage planning. Position Fox as a financial guide across life events, not just a transaction.

Key personalisation: Reference the loan purpose where captured (e.g. renovation, wedding, debt consolidation). This ICA responds strongly to being seen as an individual.

FHL pathway: New Purchase or Refinance. Content from Day 180 onward should reflect their likely next step — for renters, it's first purchase; for mortgagees, it's refinance or equity release.

Return loan pathway: After debt consolidation, the natural next FFG loan is a vehicle purchase or a renovation loan once cash flow is freed. After a travel or wedding loan, the next step is often another life-event personal loan or a vehicle upgrade. Do not assume consolidation leads to more consolidation — the natural progression is toward a vehicle or home improvement loan. Target the return loan conversation from Month 9.

ICA 3 — Prime Convenience-Led Repeat Borrower

Premium return customer | Established household | FHL pathway: New Purchase, Refinance, or Investor

Who they are

35–60 years old. Married or partnered. Homeowner or mortgaged. Strong credit profile. They have a well established credit and lending history and they value speed, simplicity, and being remembered — in particular the high level of trust combined with personal service. They don't need hand-holding. They need to feel like a priority. This is FFG's highest-value customer. Treat them accordingly.

What they need from this journey

- To feel recognised as a returning or premium customer — VIP treatment
- Market intelligence that respects their financial sophistication
- Minimal friction when they're ready for their next loan — we should already have their details
- A compelling reason to think about investment or home equity before they need to

Journey Map

Touchpoint	Channel	Theme	Content Hook	FHL Cross-Sell
Day 3 (Email)	Email	VIP Welcome Back	Subject: '[Name], it's good to have you back' Content: Brief, warm, personal. Acknowledge their history with Fox (if repeat). Express genuine appreciation. Google Review CTA. Tone: Exclusive, warm, peer-to-peer — not corporate.	None.
Day 7 (SMS)	SMS	Personal Check-In	Hey [Name], just making sure everything settled smoothly. Always here if you need anything. — The Fox Team	None.
Day 30 (Email)	Email	Market Pulse	Subject: 'What's moving in finance right now — and what it means for you' Content: Short market intelligence brief. Rate movements, lending trends, any changes relevant to their loan type. One actionable insight. No sell. Tone: Informed, peer-to-peer.	None.
Day 90 (Email + SMS)	Email + SMS	Q1 Exclusive Update	Subject: 'Your 3-month update — and something worth knowing' Content: Loan milestone. A piece of market intelligence relevant to their profile. Optional: introduce the concept of pre-approval readiness for their next vehicle. SMS: 'Hey [Name], 3 months in. Any changes coming up that we should help plan for? Always happy to chat. — The Fox Team'	None yet.
Day 180 (Email + SMS)	Email + SMS	Equity & Opportunity	Subject: 'The one question worth asking at the halfway mark' Content: Rate environment. Is there an opportunity to refinance their loan, or use equity in their home for something smarter? Investment property angle for those with mortgage. SMS: 'Hey [Name], mid-year already. We've been watching the market — there's something worth knowing. [link]'	Introduce FHL: 'If your property equity could be working harder, the Fox Home Loans team is the right conversation to have.' → FHL /home-loans/health-check/ or /home-loans/investor/

Day 270 (Email + SMS)	Email + SMS	Pre-Approval Ready	Subject: 'Ready before you need to be — here's why that matters' Content: The value of being pre-approved before you need the loan. No wasted time, no delays, no surprises. Offer to prepare a profile so they're ready to move fast. SMS: 'Hey [Name], are you ready for whatever's next? Let's make sure you're pre-approved before you need it. — The Fox Team [link]'	FHL investment angle: 'Thinking about your next investment property? Our Fox Home Loans team works with investors who want to move fast.' → FHL /home-loans/investor/ or /apply/
Day 365 (Email + SMS)	Email + SMS	Annual Review	Subject: '[Name], it's time for your annual finance review' Content: Formal (but warm) annual review offer. Rate comparison. Any better options? Pre-approval renewal. Investment opportunity review. SMS: 'Hey [Name], annual review time — we can make sure you're in the best position possible. Worth a call? — The Fox Team'	Strong FHL cross-sell: 'Whether it's refinancing, investment property, or your next home purchase — the Fox Home Loans team is ready.' → FHL /apply/

Content theme: VIP intelligence and proactive preparation. This customer doesn't need educating — they need Fox to be one step ahead of them.

Tone distinction: The most professional and peer-level tone of all five ICAs. Less 'warm and reassuring' — more 'I know your situation, and here's what I'm watching.'

FHL pathway: This ICA has the highest FHL conversion potential. Investment property and refinancing are both realistic — tailor the FHL seed from Day 180 based on whether they're a homeowner.

Return loan probability: Highest of all ICAs. If no return loan by Month 9, the sequence should include a direct 'what's your next purchase?' SMS. Their return is driven by life events and opportunity — not financial stress. Pre-approval offer at Day 270 is the most effective trigger for this ICA.

ICA 4 — Business Asset Borrower

Business vehicle, equipment, or commercial loan | FHL pathway: Commercial Property | Residential Purchase or Refinance (Low Doc/Alt Doc)

Who they are

Small business owner, tradie, or sole trader. Loan is for a truck, equipment, vehicle, or business purpose. Variable credit profile depending on trading history. They think in terms of ROI and cash flow, not feelings. They want a finance partner who understands business — speaks the language, knows the rules, and doesn't waste their time.

What they need from this journey

- Tax and financial planning content that adds practical value to their business
- EOFY relevance — June is the most important financial moment of their year
- Practical tools and frameworks they can actually use — not market commentary
- A partner who tracks their needs proactively, not reactively
- A commercial property conversation — and a residential home loan conversation via low doc/alt doc options — when the business is ready

Journey Map

Touchpoint	Channel	Theme	Content Hook	FHL Cross-Sell
Day 3 (Email)	Email	Business Welcome	Subject: '[Name], your [asset type] is working — let's make sure your finance is too' Content: Confirm settlement details. How to maximise tax deductibility (chattel mortgage vs. finance lease). Google Review CTA. Tone: Business-to-business, practical, no fluff.	None.
Day 7 (SMS)	SMS	Quick Check-In	Hey [Name], all settled for the [truck/equipment]? Give us a call if the paperwork throws anything up. — The Fox Team	None.
Day 30 (Email)	Email	Tax & Structure Tool	Subject: 'Are you claiming everything you're entitled to on your [asset]?' Content: ATO deductibility guide for the specific loan structure. What to give their accountant. Instant Asset Write-Off eligibility check. Three practical questions to ask their accountant at next meeting. No sell — pure value. Link to: ATO business deductions reference tool.	None.
Day 90 (Email + SMS)	Email + SMS	Cash Flow Framework	Subject: 'Three months in — is your business finance working as hard as the asset?' Content: Cash flow management framework for business asset owners. Payment calendar review. Asset utilisation check — is the asset generating the return expected? What upcoming equipment needs are on the horizon? SMS: 'Hey [Name], 3 months in — how's the [asset] performing for the business? Worth a quick check on your finance structure. [link]'	None.
Day 180 (Email + SMS)	Email + SMS	EOFY Checklist	Subject: 'EOFY is [X weeks] away — your business finance checklist' Content: Practical EOFY checklist for business asset	Commercial and residential seed: 'From commercial property to

			owners. What to action before June 30. Additional equipment finance opportunity before year end. Cash flow review. Three things to discuss with accountant. SMS: 'Hey [Name], EOFY checklist is ready — anything we can help sort for the business before June 30? [link]'	self-employed home loans — our Fox Home Loans team covers both. No tax returns required for many of our residential options.' → FHL /commercial-property/ and /home-loans/low-doc/
Day 270 (Email + SMS)	Email + SMS	New FY Planning Framework	Subject: 'New financial year — and smart business owners are already planning' Content: New FY business finance planning framework. Equipment audit checklist — what assets are due for replacement or upgrade in the next 12 months? Cash flow forecast tool. Pre-approval readiness for next vehicle or equipment purchase. SMS: 'Hey [Name], new FY is here — are you set up for the year ahead? Worth a chat about your equipment plans. — The Fox Team [link]'	FHL Commercial + Residential: 'If owning your own premises or purchasing a home as a self-employed borrower is on the roadmap, the Fox Home Loans team has a path forward.' → FHL /commercial-property/ or /apply/
Day 365 (Email + SMS)	Email + SMS	Annual Business Review	Subject: 'One year on — your business finance deserves a proper review' Content: Annual review offer. Rate comparison for current loan. Any additional equipment needs? Business growth — time for a bigger truck, second vehicle, or premises? Pre-approval readiness. SMS: 'Hey [Name], one year with your [asset] — ready for the annual review? We'll make sure you're in the best position for the year ahead. — The Fox Team [link]'	Strong FHL cross-sell — commercial and residential: 'From commercial property to a home loan without tax returns — Fox Home Loans covers every stage of business growth and personal wealth building.' → FHL /commercial-property/ or /home-loans/self-employed/ CTA.

Content theme: Business growth, tax efficiency, and practical tools. This ICA responds to content with a direct line to their bottom line, ATO obligations, or business planning — not market commentary.

Practical over market: Do not send market update emails to this ICA. Replace market framing with tools — checklists, frameworks, calculators, and step-by-step guides they can action immediately.

EOFY timing: If the loan settles between January and April, Day 180 falls near June — use the EOFY checklist version. If it settles in July–December, Day 180 is mid-financial-year — use a mid-year business finance review instead.

FHL pathway — expanded: Commercial property remains the primary FHL cross-sell. From Day 180, also introduce residential purchase or refinance via low doc/alt doc options. The key message for residential: 'You do not need tax returns to get a home loan as a self-employed borrower — BAS statements and an accountant's letter are often sufficient.' This opens a second FHL pathway previously not offered to this ICA.

Return loan pathway: Business asset replacement cycle is typically 3–5 years for major equipment and 2–3 years for commercial vehicles. Day 365 annual review is the primary return loan window. EOFY (June) is also a natural trigger regardless of loan anniversary. Secondary opportunity: additional equipment as the business grows.

ICA 5 — Prime Vehicle Borrower

Premium/luxury vehicle | Sophisticated finance consumer | FHL pathway: New Purchase, Refinance, or Investor

Who they are

Established consumer, often 35–60. Likely a homeowner. Buying a premium vehicle — possibly with balloon payment or structured finance. They know how finance works. They shop around. They chose Fox because we were competitive and professional — not because we were warm and fuzzy. They will return if we prove we know what we're doing.

What they need from this journey

- Facts and practical information they can leverage to understand how their finance structure affects their outcomes
- Efficient, low-friction service — no over-communication, no generic content
- Pre-approval readiness before they need it — they hate wasting time at the dealership
- An investment property or refinancing conversation when the timing is right

Journey Map

Touchpoint	Channel	Theme	Content Hook	FHL Cross-Sell
Day 3 (Email)	Email	Settlement Confirmation	Subject: '[Name], all settled — a couple of things worth knowing' Content: Brief confirmation. Key loan details (balloon, term, comparison rate reminder). One practical tip (extra repayments, how to contact Fox for next purchase). Google Review CTA. Tone: Direct, professional, concise.	None.
Day 7 (SMS)	SMS	Brief Check-In	Hey [Name], just confirming everything settled smoothly. Give us a call before your next purchase — we'll have you pre-approved fast. — The Fox Team	None.
Day 30 (Email)	Email	Finance Structure Facts	Subject: 'How your loan structure affects what you actually pay' Content: Plain facts about their loan structure. How a balloon payment works and what it means for total cost. How extra repayments reduce interest. Comparison rate vs. headline rate — what the difference means in dollars. One specific implication for their loan. Tone: Factual, informative, peer-level.	None.
Day 90 (Email + SMS)	Email + SMS	Loan Health Check	Subject: 'Three months in — is your loan structure still optimal?' Content: Practical loan health check framework. Are extra repayment opportunities being used? Balloon planning if applicable — what will they owe at maturity and what are the options? Refinancing trigger: if rates have moved meaningfully, flag it with specific numbers. SMS: 'Hey [Name], 3-month loan health check — worth a quick read if you're planning your next purchase. [link]'	None.
Day 180 (Email + SMS)	Email + SMS	Equity & Rate Review	Subject: 'Could your money be working harder right now?' Content: Rate comparison. Refinance opportunity assessment. If they're a homeowner —	FHL equity angle: 'If your home equity could fund your next investment — or reduce your loan costs

			equity release or investment property angle. SMS: 'Hey [Name], mid-year rate check — the market has moved. Might be worth a look. [link]'	— Fox Home Loans can run the numbers.' → FHL /home-loans/investor/ or /home-loans/health-check/
Day 270 (Email + SMS)	Email + SMS	Pre-Approval: Ready Before You Need It	Subject: 'The smartest thing to do before buying your next car' Content: Pre-approval process. How to be ready at the dealership. The advantage of walking in pre-approved — speed, negotiating power, no dealer finance pressure. SMS: 'Hey [Name], thinking about your next vehicle? Get pre-approved first — we can have it sorted fast. — The Fox Team [link]'	Investment angle: 'While we're at it — if an investment property is part of your plan, the Fox Home Loans team works with borrowers like you every day.' → FHL /apply/
Day 365 (Email + SMS)	Email + SMS	Annual Review + Next Vehicle	Subject: '[Name], one year on — and your next purchase window is opening' Content: Loan anniversary. Balloon payment approaching (if applicable) — your options explained. Vehicle trade-in timing. Rate comparison for refinance. Offer to prepare pre-approval for next vehicle. SMS: 'Hey [Name], one year in — we can have you pre-approved for your next vehicle before you even step into a dealership. Worth a call? — The Fox Team [link]'	Strong FHL cross-sell: 'From your next vehicle to your next property — Fox Finance Group and Fox Home Loans have every stage covered.' → FHL /apply/ or /home-loans/investor/

Content theme: Finance intelligence and strategic readiness. This ICA doesn't want a guide — they want facts and practical implications they can act on. Replace market briefing language with specific, useful information about their loan and their options.

Key distinction from ICA 3: Similar profile, but ICA 5 is defined by the vehicle purchase specifically — they may not be a repeat FFG customer yet. Tone is slightly more formal, content is more vehicle-finance specific.

Balloon payment: If their loan has a balloon, this is a major touchpoint at Month 9–12. The balloon payment conversation is both a service moment and a return loan opportunity. Begin the balloon planning conversation at Day 270 and make it explicit at Day 365.

FHL pathway: Investment property and refinancing. This ICA has the financial profile for both. From Day 180, the FHL angle should be investment-first.

Return loan pathway: Balloon payment at end of term is the primary return trigger — this creates a natural return loan event without requiring outreach. Pre-approve them for the residual and next vehicle 60–90 days before balloon maturity. Secondary: vehicle upgrade cycle every 2–3 years for premium consumers. Day 270 pre-approval offer is the critical conversion window for this ICA.

7. FHL Cross-Sell Integration

Every FFG customer is a potential FHL customer. This is not a product push — it is a logical next chapter. The ICA-to-purchase-type mapping below ensures the right FHL product is introduced to the right person at the right time.

7.1 ICA to FHL Purchase Type Mapping

FFG ICA	FHL Purchase Type	FHL Entry Point	Timing
Young Practical Motor Borrower	First Home Buyer	/home-loans/first-home-buyer/ Borrowing Power Calculator	Day 270 (seed) + Day 365 (conversion)
Established Personal Finance Borrower	New Purchase O/O or Refinance	/apply/ /home-loans/health-check/	Day 180 (seed) + Day 270 (conversion)
Prime Convenience-Led Repeat Borrower	New Purchase O/O, Refinance, or Investor	/home-loans/investor/ /home-loans/health-check/ /apply/	Day 180 (seed) + Day 270 (conversion)
Business Asset Borrower	Commercial Property AND Residential (Low Doc/Alt Doc — no tax returns required)	/commercial-property/ /commercial-construction/ /home-loans/self-employed/ /apply/	Day 180 (seed, both pathways) + Day 365 (conversion)
Prime Vehicle Borrower	New Purchase O/O, Refinance, or Investor	/home-loans/investor/ /home-loans/health-check/ /apply/	Day 180 (seed) + Day 270 (conversion)

BAB residential note: Many self-employed borrowers assume they cannot get a residential home loan without two years of tax returns. This is not correct. Low doc and alt doc options accept BAS statements, an accountant's letter, or 12 months of business bank statements. The key message in BAB FHL content: 'You do not need tax returns to get a home loan. We can show you how.' A 20% deposit and 2 years ABN are typically required. This is a significant and underutilised cross-sell pathway for BAB.

7.2 FHL Referral Workflow

When any contact clicks on FHL-related content in the FFG sequence, the FHL_Interest tag is applied and the contact enters the FHL Referral Workflow. This is a standalone 3-email sequence introducing Fox Home Loans — designed as a warm, value-first introduction before any product conversation.

FHL Referral Email	Timing	Content	CTA
Email 1 — Warm Intro + Lead Magnet	Day 0 (immediately on FHL_Interest tag)	Warm introduction: acknowledge that they showed interest in home loan content. No hard sell. Deliver an ICA-specific lead magnet — a relevant calculator, guide, or checklist. YPMB: First Home Buyer deposit guide. EPFB/PCLRB: Refinance savings calculator. BAB: 'Can a self-employed borrower get a home loan?' guide. PVB: Investment property borrowing power calculator. Value first — let them explore.	Link to lead magnet resource. Soft prompt to reply with questions.
Email 2 — Education (Day 7)	Day 7 (if no conversion on Email 1)	The FHL process explained. The 5 steps: Enquire → Speak with Expert → Pre-Approval → Sign Documents → Settle Loan. Plain English. What Fox Home Loans does	FHL /apply/ — 'When you're ready, this is where to start.' Or book a

		differently. No jargon. ICA-appropriate tone — nurturing for YPMB, informative for PVB, practical for BAB.	discovery call via FHL calendar link.
Email 3 — Social Proof + Apply CTA	Day 14 (if no conversion on Emails 1–2)	One customer story (anonymised) — an FFG customer who became an FHL customer and what happened next. Keep it real and specific. Social proof: 5 Star Google Reviews, 1,000+ FHL customers. Soft but clear CTA.	FHL /apply/ — 'Ready when you are.' No pressure. Clear path forward.

After the 3-email FHL sequence, the contact resumes their FFG ICA workflow from where they left off. If they converted (booked a call or applied), they are tagged FHL_Converted and the FFG sequence continues with a softer frequency.

7.3 Compliance Note — FHL Cross-Sell Content

IMPORTANT: All FHL content embedded in FFG emails must include the standard FHL disclaimer: 'Fox Home Loans is an Australian Credit Representative (ACR 535038). This content is general information only and does not constitute financial advice.'

FFG cannot make any rate claims or approval promises in FHL cross-sell content. FHL content must be educational or referral only — the FHL broker handles the product conversation.

All cross-sell content is DRAFT until reviewed by Rowdz for compliance and editorial accuracy before loading into GHL.

8. Email & SMS Best Practice Standards

These standards apply to every touchpoint in this system. They are informed by 2024–2026 financial services email marketing data and Australian market research.

8.1 Email Standards

Element	Standard for FFG Nurture Sequence
Subject line format	Question or intrigue > Benefit > Name only. Avoid: 'Apply now', 'rates from X%', 'you may be eligible'. Aim for 35–50 characters.
Preview text	Always set — extend the subject, don't repeat it. 'Here's what 3 months of repayments has done for you...' etc.
Sender name	'The Fox Finance Team' — a named team sender outperforms generic brand names for nurture emails in financial services.
Email format	HTML with plain text fallback. Minimal design — not a newsletter. Single column, one image max, clear CTA button. Reads well on mobile.
Email length	250–400 words for value emails. Under 150 words for milestone/SMS-companion emails. Never more than 500 words.
CTA count	One primary CTA per email. Optionally one secondary (lighter). Never more than two CTAs.
Send time	Tuesday–Thursday, 8–10am AEST. Avoid Monday (inbox overload) and Friday (low engagement). Test Wednesday 8:30am as default.
Personalisation	First name (minimum). Reference loan type where captured. ICA-specific content is the primary personalisation mechanism.
Compliance footer	Standard FFG disclaimer on every email. ACL 382952. Unsubscribe link. FHL disclaimer when FHL content included.
Unsubscribe handling	Any unsubscribe exits all FFG nurture sequences. Apply 'FFG_Unsubscribed' tag. Do not re-enter.

8.2 SMS Standards

Element	Standard for FFG Nurture Sequence
Length	Under 160 characters where possible. Never more than 320. Concise, conversational, human.
Sender	The Fox Finance Team (or registered sender ID if GHL/Twilio configured). Sign off with '— The Fox Team'.
Tone	Conversational and personal. Like a message from someone who knows you. Not a broadcast. Not a template.
CTA format	One short link only (GHL short link or UTM-tagged FHL/FFG URL). Never paste a raw long URL.
Timing	12pm–2pm AEST midweek. Never before 9am or after 8pm. Never on public holidays.
Consent	ACMA compliance — explicit marketing consent must be captured at loan application. Confirm consent flag in GHL before SMS sends.
Frequency	Maximum 2 SMS per month during active sequence. Maximum 1 per month during low-engagement path.
Reply handling	Any SMS reply triggers 'FFG_SMSActive' tag. Manual broker follow-up required within 24 hours. Do not automate replies beyond an acknowledgement and what will happen next — for example, options for contact preference.

Opt-out	'Reply STOP to unsubscribe' included in first SMS of sequence. Honoured immediately — apply 'FFG_SMSOptOut' tag.
---------	--

8.3 Subject Line Framework by Touchpoint Type

Email Type	Subject Line Formula	Examples
Welcome / Review	Name + personal acknowledgement	'[Name], you just did something worth celebrating' '[Name], thanks for trusting us'
Milestone	Progress marker + implication	'3 months in — here's what's changed for you' 'Halfway there — and your options are growing'
Educational value	Question or fact that surprises	'Did you know your loan is building your credit score?' 'What it actually takes to buy your first home'
Market intelligence or finance information relevant to ICA	Intelligent observation	'What the rate environment means for you right now' 'Could your money be working harder?'
FHL cross-sell	Future possibility	'What does your next chapter look like?' 'One question worth asking at the halfway mark'
Return loan pitch	Anniversary + forward momentum, saving money	'One year on — here's what's next' '[Name], your next purchase window is opening'
Win-back	Pattern interrupt	'We haven't heard from you — one thing before we go quiet' 'Still here if you need us, [Name]'

9. Fox-MIS → GHL Intelligence Pipeline

Fox-MIS is not just a content creation system — it becomes the intelligence layer that feeds GHL with smarter copy, sharper segmentation, and ongoing learning from customer engagement. This is how the two systems connect.

The pipeline works in three directions:

1. Fox-MIS → GHL: Intelligence and content flow into GHL sequences as templates and segmentation data.
2. GHL → Fox-MIS: Engagement data (open rates, click rates, top-performing subjects) feeds back into Memory Manager and ICA intelligence files.
3. Fox-MIS → GHL Segmentation: Keyword trends and customer language patterns inform GHL custom fields and tag criteria.

9.1 Content Creation Pipeline

Step	Who	Action	Output
1. ICA Brief	Fox-MIS CLAUDE.md	ICA profiles, language patterns, pain points, vocabulary from customer reviews	Source intelligence for EDM Creator Agent
2. Email Draft	EDM Creator Agent (Fox-MIS)	Drafts each email using ICA brief, brand voice, compliance rules, subject line framework	DRAFT email file in Fox-MIS outputs folder
3. Review	Rowdz	Reviews email for brand voice, compliance, accuracy	Approved email (or revision request)
4. GHL Load	Rowdz / Admin	Approved email HTML loaded into GHL sequence template for relevant ICA workflow	Live GHL email template
5. Performance Capture	Rowdz (monthly)	GHL email performance exported (open rate, click rate, top subjects)	Performance data file for Fox-MIS
6. Intelligence Update	Memory Manager (Fox-MIS)	Performance data processed → updates ICA intelligence → informs next email draft	Updated ICA files, refined email brief for next cycle

9.2 GHL Segmentation from Fox-MIS Intelligence

Fox-MIS Source	GHL Application
ICA profiles (CLAUDE.md)	GHL custom fields: ICA_Type, FHL_PurchaseType, LoanType — used for personalisation tokens in email templates
Google Review language patterns (memory/ica-intelligence.md)	Vocabulary list used by EDM Creator Agent to write emails that match how real FFG customers speak
Keyword trends (Semrush weekly data)	Informs email content topics — if 'bad credit car loans' is trending, ICA 1 emails reference the topic
Top-performing content (Fox-MIS SEO data)	Blog posts and landing pages linked from nurture emails are the highest-traffic Fox-MIS content — tested engagement before embedding
Seasonal intelligence (Reporting Agent)	EOFY timing, rate movement alerts, and seasonal relevance flags trigger time-sensitive email variants

9.3 The Performance Feedback Loop

On a monthly basis, GHL email performance data is exported and reviewed by the Fox-MIS Reporting Agent. The loop closes as follows:

- Subject lines with >55% open rate → flagged as proven formulas, added to Fox-MIS copy-log.md
 - Links with >4% CTR → content type logged as high-performing, prioritised in next email brief
 - Emails with <30% open rate → subject line formula reviewed, ICA brief revisited
 - High SMS reply rates → ICA profile updated with topics that drove conversation
 - FHL referral conversion → tagged in GHL, tracked as Fox-MIS to FHL pipeline metric
-

10. GHL Implementation Roadmap

This system is complex in design but straightforward to build in GHL given the right sequencing. The following roadmap breaks implementation into four phases.

Phase	Tasks	Owner	Timing
Phase 1 — Foundation	• Set up all GHL tags (FFG_Settled, ICA_*, LoanType_*, engagement tags) • Create custom fields: ICA_Type, FHL_PurchaseType, LoanType, SettlementDate • Build Master Entry Workflow (routing only — no content) • Set up unsubscribe groups and SMS opt-out handling • Configure Twilio sender in GHL	Rowdz + GHL admin	Week 1–2
Phase 2 — Content Production	• EDM Creator Agent drafts all emails (5 ICAs × 7 touchpoints = 35 base emails) • Rowdz reviews and approves each email • SMS copy drafted for each touchpoint (5 ICAs × 4 SMS = 20 SMS messages) • FHL Referral Workflow: 3 emails drafted by EDM Creator Agent + FHL review • All content loaded into GHL as templates	Fox-MIS EDM Creator + Rowdz	Week 2–5
Phase 3 — Workflow Build	• Build all 5 ICA sub-workflows in GHL • Build Behavioural Branch Workflows (4 triggers) • Build FHL Referral Workflow • Build Broker Handoff Workflow • Test all workflows with internal contacts before live	Rowdz + GHL admin	Week 4–6
Phase 4 — Launch & Monitor	• Migrate existing 'Customer Care' contacts to new system (apply ICA tags retroactively) • Deactivate existing SendGrid sequence • Launch with new settled contacts first • Monitor first 30 days: open rates, click rates, SMS replies, FHL referral tags • Monthly performance review with Fox-MIS Reporting Agent	Rowdz	Week 6–8

10.1 Existing Contact Migration

The existing 'Customer Care' contacts in SendGrid represent ~5,400 customers at various stages of the old sequence. Migration to GHL should follow this approach:

- Export all existing contacts from SendGrid with engagement history
- For contacts with known loan type: apply ICA tag and enrol in GHL sequence from the closest equivalent touchpoint
- For contacts without known loan type: apply a temporary 'ICA_Unknown' tag and enrol in a simplified single-track sequence until ICA can be determined
- Contacts who have already received Email 4 or later (Day 365+): do not restart from Day 1 — enrol at the equivalent touchpoint in the new system
- Unsubscribes from SendGrid: import suppression list into GHL immediately before any sends

11. Compliance & Regulatory Notes

ALL content produced by this system is DRAFT until reviewed by Rowdz (and where relevant, a compliance-qualified reviewer) before loading into GHL. The completion of this strategy document does not authorise any content for sending.

Key compliance obligations for this system:

- NCCP Act — All references to credit products must not imply guaranteed approval. Use 'may be eligible', 'subject to lending criteria', 'subject to assessment'. Never 'you're approved' or 'you will qualify'.
 - ASIC RG 234 — Financial promotions must be honest, accurate, and not misleading. Rate claims in any email require a comparison rate disclaimer. This applies to any email referencing a rate — including FHL content.
 - ACMA Spam Act — All emails must include a functioning unsubscribe mechanism. Unsubscribes must be honoured within 5 business days (GHL handles this automatically if configured correctly).
 - ACMA Telemarketing & Fax Marketing Code — SMS marketing requires prior express consent. Confirm the consent field is captured in GHL for every contact before SMS sends activate.
 - Privacy Act 1988 — Customer data used for personalisation (loan type, ICA, FHL purchase type) must be consistent with the purpose for which it was collected. Review privacy policy if data use expands beyond loan servicing.
 - FHL ACR 535038 — All FHL cross-sell content must include the FHL credit representative disclaimer. FHL cannot be presented as holding its own licence.
 - General information disclaimer — Every email (not just blog posts) should include: 'This email contains general information only and does not constitute financial advice.'
 - Review request (Email 1) — Google Review requests are not regulated financial promotions, but must not offer any incentive for positive reviews (ACCC guidelines). The existing approach (request only, no incentive) is compliant.
-

12. Content Production Requirements

The following table summarises every piece of content that needs to be produced before this system can go live. All items are briefed to the Fox-MIS EDM Creator Agent.

ICA	Content Items Required
ICA 1 — YPMB	7 emails × 1 + 4 SMS = 11 pieces Plus: FHL Referral Workflow (3 emails shared across applicable ICAs)
ICA 2 — EPFB	7 emails + 4 SMS = 11 pieces
ICA 3 — PCLRB	7 emails + 4 SMS = 11 pieces
ICA 4 — BAB	7 emails + 4 SMS = 11 pieces (EOFY variant for Day 180 + New FY variant for Day 270)
ICA 5 — PVB	7 emails + 4 SMS = 11 pieces (balloon payment variant for Day 365)
FHL Referral Workflow	3 emails (ICA-specific lead magnet for Email 1) — requires FHL team review and sign-off
Broker Handoff Template	1 internal notification template + 1 broker follow-up email template
Win-Back Sequence	2 emails (shared — ICA tone applies at send time)
TOTAL	~65 pieces of content (emails + SMS). Production in 4-week batches by ICA.

Production priority order: ICA 3 (PCLRB — highest value), ICA 5 (PVB — high return probability), ICA 1 (YPMB — highest FHL conversion potential), ICA 2 (EPFB), ICA 4 (BAB).

13. Blog Content Map — FFG & FHL

This section maps the existing blog content on foxfinancegroup.com.au and foxhomeloans.com.au to each ICA nurture touchpoint. It identifies which blog posts can be linked directly from email CTAs today, which posts are a partial fit, and where content gaps require new posts to be created.

This map is maintained by the Fox-MIS Long Form Blog Copy Agent. When a new post is published that maps to a nurture touchpoint, this section should be updated and the corresponding 'GAP' status resolved.

Status legend:

EXISTS — A suitable post exists and can be linked from the email CTA immediately.

PARTIAL — The closest available post has some relevance but a better-fit piece would improve performance. Link the existing post now; plan the ideal piece for next content cycle.

GAP — No suitable post exists. A new post must be created before this touchpoint can include a blog link. Priority briefs are at the end of this section.

How to Use This Map

Each email touchpoint in the ICA journey maps (Section 6) carries a blog link where appropriate. Use this map to confirm the URL before loading the email into GHL. For UTM tracking, append:

?utm_source=ghl&utm_medium=email&utm_campaign=nurture_[ica]_[day]

All blog links in GHL emails must go to the full URL with UTM parameters. This allows Fox-MIS SEO data and GA4 to track which nurture touchpoints are driving traffic and informing return loan intent.

Priority Content Gap Briefs

The following posts are required to fill the identified gaps. Each should be briefed to the Long Form Blog Copy Agent using the standard activation path.

PRIORITY BRIEF 1 — YPMB Return Loan Pathway (FFG)

Working title: 'What Comes After a Car Loan? Your Next Financial Step'

Target keyword: personal loan after car loan | ICA: YPMB | Word count: 1,200–1,500

Angle: Using your car loan as a springboard. How a well-managed car loan opens doors to personal loans for lifestyle goals — travel, education, emergency fund, second vehicle. Credit confidence and financial progression language. No doom. No pressure.

CTA: /apply-personal-loans/ | Internal links: improve credit score post, 10 reasons for a personal loan

PRIORITY BRIEF 2 — EPFB Return Loan Pathway (FFG)

Working title: 'Debt Consolidation Was Step One — Here's Step Two'

Target keyword: after debt consolidation what next | ICA: EPFB | Word count: 1,200–1,500

Angle: Once cash flow is freed, what's the smart next move? Renovating, buying a vehicle, or building a savings buffer. Financial momentum post-consolidation. Map the natural next goals for someone who just simplified their debt.

CTA: /apply-personal-loans/ or /apply-vehicle-loans/ | Internal links: debt consolidation myths, rainy day fund post

PRIORITY BRIEF 3 — PCLRB Annual Review (FFG)

Working title: 'Your Annual Finance Review: A Checklist for Smart Borrowers'

Target keyword: annual finance review | ICA: PCLRB, PVB | Word count: 1,200–1,500

Angle: Peer-level, intelligent. What financially savvy Australians do at the end of every year — rate comparison, pre-approval readiness, investment review, equity position. Positions Fox as the partner for this annual check-in.

CTA: /apply/ (generic) | Internal links: car loan pre-approval post, comparison rate post

PRIORITY BRIEF 4 — BAB New FY Planning (FFG)

Working title: 'EOFY Business Finance Checklist for Small Business Owners'

Target keyword: EOFY business finance checklist | ICA: BAB | Word count: 1,500–2,000

Angle: Practical. A checklist-style post covering: Instant Asset Write-Off status, equipment finance before June 30, cash flow review, what to discuss with accountant, and planning for next FY. Downloadable checklist angle if possible.

CTA: /apply-business-loans/ | Internal links: equipment finance post, unsecured business loans post

PRIORITY BRIEF 5 — BAB FHL Residential (FHL)

Working title: 'How Business Owners Can Get a Home Loan Without Tax Returns'

Target keyword: self-employed home loan no tax returns | ICA: BAB | Brand: FHL | Word count: 1,500–1,800

Angle: Direct myth-busting. Many business owners believe they need two years of tax returns to get a home loan. They are wrong. BAS statements, an accountant's letter, or 12 months of business bank statements are often sufficient. 20% deposit and 2 years ABN typically required. Written in plain business language — not mortgage jargon.

CTA: FHL /apply/ | Internal links: low doc loans explainer, self-employed home loan pitfalls post

PRIORITY BRIEF 6 — PVB Balloon Payment (FFG)

Working title: 'Your Balloon Payment is Coming — Here Are Your Options'

Target keyword: balloon payment car loan options | ICA: PVB | Word count: 1,200–1,500

Angle: Practical and reassuring. What a balloon payment is, when it arrives, and the three options: pay in full, refinance the residual, or trade in and refinance the next vehicle. Which option makes financial sense for different situations. No fear — this is a normal part of structured vehicle finance.

CTA: /apply-vehicle-loans/ | Internal links: comparison rates post, refinancing your car loan post

PRIORITY BRIEF 7 — PVB Finance Structure (FFG)

Working title: 'Vehicle Finance Structures Explained: Chattel Mortgage, Finance Lease, and CHP'

Target keyword: chattel mortgage vs finance lease | ICA: PVB, BAB | Word count: 1,500–1,800

Angle: Factual and informative. No hand-holding. Explain each structure clearly, what it means for tax treatment, who each suits, and how the choice affects total cost. Include a simple comparison table. For buyers who already know finance and want a peer-level explanation.

CTA: /apply-vehicle-loans/ or /apply-business-loans/ | Internal links: comparison rates post, equipment finance post

Content production note: Priorities 5 (BAB Residential) and 6 (PVB Balloon) represent the highest-impact gaps in the nurture system. Priority 5 opens a new FHL revenue pathway for the BAB ICA. Priority 6 creates a natural return loan touchpoint for PVB that is currently not served by any existing content. These two should be commissioned first in the next content batch.

14. Next Steps

IMMEDIATE ACTIONS (this week):

1. Review and approve this strategy document — mark any sections requiring adjustment.
2. Share with business partner for input (flag: this touches all settled FFG customers).
3. Confirm GHL and Twilio are set up and configured for automated sends.
4. Commission Phase 1 (GHL Foundation) — tags, custom fields, master workflow.
5. Review Blog Content Map (Section 13) — confirm Priority Briefs 5 and 6 are first in the next content batch.

FOX-MIS ACTIONS (once strategy is approved):

6. Brief EDM Creator Agent to draft ICA 3 (PCLRB) emails first — 7 emails + 4 SMS.
7. EDM Creator produces full email suite ICA by ICA over 4-week production cycle.
8. Long Form Blog Copy Agent to begin Priority Briefs from Section 13 — start with Briefs 5 and 6.
9. Memory Manager updates ICA intelligence files with GHL field structure for future reference.

ONGOING:

10. Monthly GHL performance export → Reporting Agent → intelligence update loop.
11. Quarterly review of sequence performance — A/B test subject lines on highest-volume ICAs.
